## **Baylor All Saints Medical Center at Fort Worth**

Baylor All Saints Medical Center at Fort Worth, located near downtown Fort Worth, is a full-service hospital dedicated to providing for the health care needs of the community. Baylor All Saints is among Tarrant County's oldest not-for-profit hospitals and celebrated 100 years of service in 2006. The medical center has 525 licensed beds and offers a broad range of medical services including programs of excellence in cardiology, transplantation, neurosciences, oncology and women's services.

### **HIGHLIGHTS**

#### ***Baylor All Saints Regional Heart Center***

Baylor All Saints Regional Heart Center is staffed and equipped to accept cardiac patients from the first signs of heart and vascular trouble. The center's services include a cardiac catheterization lab; the Ryan Center for Electrophysiology, non-invasive cardiology, cardiovascular surgery, cardiopulmonary rehabilitation, specialized intensive care units, and a progressive care unit, and chest pain accreditation.

#### ***Laura Leonard Hallum Neuroscience Center***

The Laura Leonard Hallum Neuroscience Center encompasses three neuroscience operating rooms with high-powered microscopes and a framed stereotactic surgery system for complex brain and spinal cord surgeries, such as those performed on the skull base, spine and brain. The center utilizes technologically advanced surgical facilities and medical technologies such as Gamma Knife® surgery for the treatment of brain tumors. The center recently expanded by opening a Clinic for Movement Disorders, which will be devoted to caring for patients who suffer from Parkinson's disease as well as other movement disorders, such as essential tremors and dystonia.

#### ***Surgical Services***

The da Vinci® S HD Surgical System, a robotic platform, allows surgeons to perform complex laparoscopic surgical procedures through 1-2 cm incisions, or openings smaller than the size of a dime. The da Vinci integrates three-dimension high definition endoscopy and advanced robotic technology to virtually extend the surgeon's eyes and hands into the surgical field. Some of the benefits experienced by surgeons using the new technology over traditional approaches are greater surgical precision, increased range of motion, improved agility, enhanced visualization and improved access to the surgical site. In late October, physicians on the medical staff of Baylor All Saints performed a laparoscopic vaginal hysterectomy and pelvic lymphadenectomy (removal of lymph nodes) to treat uterine cancer using this new technology.

#### ***Oncology Services***

Baylor All Saints offers 26 private inpatient rooms designed with the latest amenities such as a large and well-appointed family room and a 13-station outpatient infusion area for the comfort and convenience of patients and caregivers. Baylor All Saints' oncology program consists of site specific cancer clinics and a general tumor board, lymphedema services, clinical research, inpatient hospice care, stroboscopy and speech therapy, palliative care, chronic pain management and stereotactic radiosurgery for treatment of brain tumors.

#### ***Transplant Services***

Baylor All Saints provides comprehensive liver, kidney, and pancreas transplant services with highly experienced, full-time transplant surgeons and transplant physicians on its medical staff, as well as skilled transplant nurses and other qualified multidisciplinary team members. Baylor All Saints has a 27-bed transplant unit for patients waiting for or recovering from transplant surgery. Baylor All Saints is one of a handful of U.S. teams currently performing pancreatic islet cell research and islet cell transplants. Under

the direction of Shinichi Matsumoto, M.D., Ph.D., this research shows significant promise in reducing the severity of symptoms associated with Type I diabetes. Islet cell transplantation is experimental and requires patients to participate in a clinic research study.

### Women's Services

Baylor All Saints is pleased to introduce the Andrews Women's Hospital. This unique facility is one of only a handful nationwide that offers women's health care for every stage of life. The hospital offers reproductive medicine, gynecological surgery, pelvic medicine, obstetrical services, and a 63-bed Level III intensive care unit for premature and low-birth weight infants. The facility also offers a comprehensive breast center, genetic testing services, an aesthetic center, a urinary incontinence treatment center and a sexual dysfunction clinic.

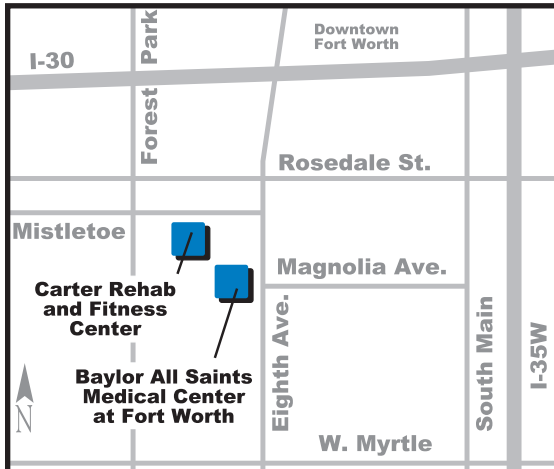

### COMMUNITY PROGRAMS

Baylor All Saints promotes the health and well-being of Tarrant County residents through a variety of programs including the Hispanic Wellness Fair, American Heart Walk, Susan G. Komen Tarrant County Race for the Cure®, African American Health Expo, National Cancer Survivors Day, Mother's Milk Bank, American Cancer Society, Senior Health & Wellness Fair and LifeGift Organ Donation Center. For fiscal year 2007, Baylor Health Care System will report \$390 million\*\* in community benefit, which includes providing care for charity patients and patients enrolled in government programs such as Medicare and Medicaid, as well as the unreimbursed costs of medical education, research and community programs.
